

# Before you Travel Checklist

## Pack:

Extra copies of your oxygen prescription

Correct tubing for day and nighttime use

A/C power supply cords for plugging into the wall

12 volt power supply if needed

Any other documentation required by travel provider

Extra batteries to last 150% of flight time if using POC during flight

## Check:

That your batteries are fully charged

That you have read the user guide for your equipment and understand the controls and how to fully operate the POC

That your vehicle has adequate power in its 12 volt receptacle

For any questions please call your local branch or 1-877-220-5246.  
In case of an emergency call 911.
