

Hand Portable / Wheeled Extinguishers and Accessories

Amerex Corporation

Product Catalog

Including Systems

WHERE TO USE

Amerex manufactures an extensive variety of hand portable and wheeled fire extinguishers, both "compliance" (code required) and "specialty" types. "Specialty" type extinguishers are intended for use on particular types of hazards, so careful attention should be made to locating them in close proximity to the specific hazard they are meant to protect. It is natural for a person to use the extinguisher located nearest to a fire. The most current issue of NFPA-10 should be consulted for minimum recommended fire extinguisher types, placement and travel distances. Your local Amerex Fire Equipment Distributor is professionally equipped to help you evaluate and implement these recommendations.

All "Picture Symbols" are detailed below and should be reviewed with all who might be expected to use a fire extinguisher. Everyone should be familiar with these picture symbols which identify the types of fires on which they may be used. The International sign system *diagonal red slash* indicates a potential danger if the extinguisher is used on that particular type of fire.

TYPES OF FIRES

CLASS A	ORDINARY COMBUSTIBLES: wood, paper, rubber, fabrics and many plastics	
CLASS B	FLAMMABLE LIQUIDS & GASES: gasoline, oils, paint, lacquer and tar	
CLASS C	FIRES INVOLVING LIVE ELECTRICAL EQUIPMENT	
CLASS D	COMBUSTIBLE METALS OR COMBUSTIBLE METAL ALLOYS (NO picture symbol)	
CLASS K	FIRES IN COOKING APPLIANCES THAT INVOLVE COMBUSTIBLE COOKING MEDIA vegetable or animal oils and fats	

TYPES OF EXTINGUISHERS:

CLASS A	  
CLASS A:B	  
CLASS A:B:C	  
CLASS A:C	 
CLASS B:C	 
CLASS D	
CLASS A:K	 

HOW TO USE

All Amerex extinguishers are furnished with a detailed "Owners Manual" containing valuable information. The manual contains information on the installation, use and maintenance of the extinguisher. The extinguisher nameplate (label) contains specific information on "HOW TO USE" the particular extinguisher. The label instructions vary slightly according to type and size. All potential operators should be totally familiar with the instructions on any extinguisher they might be required to use.

ALL AMEREX FIRE EXTINGUISHERS COMPLY WITH THE RECOMMENDATIONS OF THE NATIONAL FIRE PROTECTION ASSOCIATION AND ARE TESTED AND RATED BY UNDERWRITERS LABORATORIES OR FACTORY MUTUAL SYSTEMS TO ANSI / UL STANDARDS. ALL EXTINGUISHER NAMEPLATES CONTAIN THE NECESSARY HMIS INFORMATION TO COMPLY WITH NATIONAL AND LOCAL OSHA REQUIREMENTS.

250**

Model 240 utilizes the cooling, soaking and penetrating effect of a 45-55 ft. stream of WATER. The 55 sec. discharge time makes it very effective for inexperienced operators for use on Class A fires. Protect from freezing by adding the Model 506 Loaded Stream/Anti-freeze charge. In areas with a high level chloride content water it may be corrosion protected by using the Model 507 charge.

Model 254 AFFF FOAM unique 6 liter size fills many requirements for a lighter, more compact Class A:B extinguisher. Easy and effective application with the patented spray nozzle. Apply to Class B liquid spills to prevent ignition. Ideal for emergency first response vehicles.

Model 252 FFFP FOAM adds Class B fire fighting capability to the Class A effectiveness of this extinguisher. The *Alcohol Resistant* fire fighting agent is effective on fires in a wide variety of Class B materials such as alcohols, polar solvents, hydrocarbons and combinations such as gasohol. Apply to a non-ignited Class B liquid spill and it will seal the surface minimizing the chance of serious fire.

Model 250 AFFF FOAM Class A:B extinguisher. Easy and effective application with air aspirated nozzle. Apply to Class B liquid spills to prevent ignition. Ideal for emergency first response vehicles.

*Available in a 33 Gal. FFFP Wheeled or Stationary unit.

Wet Chemical

"Class K" - Kitchen Use Extinguisher

Meets NFPA-10 Class K Standard
ISO-9001:2000 / ISO-14001:2004 Certified
UL LISTED

- ★ Polished Stainless Steel Cylinders
- ★ All Metal Valve Construction
- ★ Swivel connection on hose allows nozzle to be oriented for proper use
- ★ Nozzle grip design with 45° angle for easy "overhead" application
- ★ Low PH agent discharged as a fine mist helps prevent grease splash and re-flash while cooling the appliance
- ★ Precise extinguishing agent application - no dry chemical to clean up
- ★ Excellent for use on all cooking appliances including solid fuel charbroilers
- ★ Tested on commercial deep fat fryers to ANSI / UL 711 test protocol and safe to use on Class C fires
- ★ Class 2A rated to meet fire code occupancy hazard requirements
- ★ Bar Coded and Bi-lingual Labels

(Temperature Range +40°F to 120°F)

FACTORY CHARGED

Model B260

Model B262

U.L. Listed

2A:K

WET CHEMICAL extinguishers are the best restaurant kitchen appliance hand portable fire extinguishers you can purchase. Both have been tested and approved for the new Class K listing by UL specifically for restaurant kitchen hazards. They contain a special potassium acetate based, low PH agent developed for use in pre-engineered restaurant kitchen systems. The recent trend to more efficient cooking appliances and use of unsaturated cooking oils dictates the use of a hand portable fire extinguisher with greater fire fighting capacity and cooling effect to combat these very hot and difficult fires. Available in two sizes - 6 liter or 2½ gal. with attractive stainless steel cylinders and easy to use hose and spray application nozzle. The superior fire fighting capability of the Wet Chemical agent is placed exactly where you aim it with no chemical residue to clean up. The Models B260 and B262 are the ideal "KITCHEN USE" fire extinguishers. They supplement existing cooking equipment automatic system protection for an extra margin of safety.

5 YEAR WARRANTY

Water Mist

An Amerex Exclusive!

Manufactured and Tested to ANSI/UL Standards
ISO-9001:2000 / ISO-14001:2004 Certified
UL LISTED

RUGGED

- ★ Painted Stainless Steel Cylinders
- ★ All Metal Valve Construction
- ★ Exclusive crevice free, butt welded cylinder

ENVIRONMENTALLY FRIENDLY

- ★ No O.D.P. (Ozone Depletion Potential)
- ★ No EPA phase out or restrictions
- ★ No global warming concerns
- ★ Non magnetic construction tested by an independent agency for use in MRI facilities

CLEAN

- ★ Non-toxic
- ★ Causes no respiratory problems
- ★ De-ionized water extinguishing agent (sold separately)
- ★ Antiseptic white paint finish (easy to clean)
- ★ No powder residue

USER FRIENDLY

- ★ Wand provides greatest operator safety
- ★ Maximum visibility during discharge
- ★ No electrical conductivity back to the operator
- ★ No thermal or static shock
- ★ Minimal training - simplest to use
- ★ Most economical agent available
- ★ Bar Coded and Bi-lingual Labels

NON-MAGNETIC

Tested to ANSI/UL 711
for Class C Listing

WATER MIST is the ultimate extinguisher for Class A fires and where a potential Class C (electrical) hazard exists. The fine spray from the unique misting nozzle provides safety from electrical shock, greatly enhances the cooling and soaking characteristics of the agent and reduces scattering of burning materials. The Amerex Water Mist extinguishers contain de-ionized water making them the best extinguishers for protection of hospital environments, valuable books and documents, telecommunication facilities and "clean room" manufacturing facilities. The Amerex Water Mist extinguishers are easy to use, maintain, and service.

HALOTRON I is a "Clean Agent" HydroChloroFluoroCarbon (HCFC) discharged as a rapidly evaporating liquid which leaves no residue. It effectively extinguishes Class A and B fires by cooling and smothering and it will not conduct electricity back to the operator. Halotron is pressurized with Argon gas and is an EPA and FAA approved agent suitable for use on Class A, B and C fires. It has a *low* GWP of 0.04 - 0.24, *low* ODP of 0.014 (twelve times lower than the EPA maximum allowable ODP of 0.20) and a *low* Atmospheric Lifetime (3½ to 11 years).

Halotron is intended for use in areas formerly protected by Halon 1211 hand portable extinguishers such as computer rooms, telecommunications facilities, clean rooms, data storage areas, offices (for protection of sensitive electronic equipment), boats and vehicles.

AVAILABLE IN WHEELED EXTINGUISHERS

HALON 1211 is a liquified gas, pressurized with nitrogen, which discharges as a vapor causing no cold or static shock and no impairment of the operator's vision. This "CLEAN" agent quickly penetrates difficult to see and hard to reach areas and leaves no residue. It is recommended for protection of delicate, sensitive and expensive computers, electrical equipment, tapes and film, automotive and aircraft engines, laboratory chemicals and equipment.

Quality industrial grade hardware, "CLEAN" agent, light weight, good discharge range and excellent fire extinguishing ability.

**NON-MAGNETIC MODEL AVAILABLE:
MODEL 322NM**

Carbon Dioxide is discharged as a white cloud of “snow” which smothers a fire by eliminating oxygen. It is effective for Class B flammable liquids and is electrically non-conductive. Carbon Dioxide is a clean, non-contaminating, odorless gas.

**Also available in 50 / 100 lb.
wheeled extinguishers and
100 lb. stationary.**

5 YEAR WARRANTY

Class D

Manufactured and Tested to ANSI/UL Standards
 ISO-9001:2000 / ISO-14001:2004 Certified
FM APPROVED

- ★ Dependable Drawn Steel Cylinders
- ★ All Metal Valve Construction
- ★ Unique “soft flow” extension applicator plus built in long range nozzle
- ★ Special corrosion resistant yellow (Class D) color coded paint finish
- ★ F.M. listed (TO ANSI/UL 299 and ANSI/UL 711)
- ★ Bar Coded and Bi-lingual Labels

The Amerex “soft flow” extension applicator is particularly suited for fighting Class D fires. It keeps the operator’s hands away from the extreme heat and prevents inhalation of toxic fumes caused by burning material. The easily controlled, even discharge provides a non-dispersing application of the agent. The applicator may be quickly detached to provide a straight stream of chemical where greater range, a narrow discharge pattern or a lobbing effect is required.

(Temperature Range -40°F to 120°F)

SPECIFICATIONS	CLASS D Dry Powder	
	Sodium Chloride	Copper

**MODELS
 B570
 B571**

FOR COMBUSTIBLE METAL FIRES

MODEL B570 contains a special blended Sodium Chloride based dry powder extinguishing agent. Heat from the fire causes it to cake and form a crust excluding air and dissipating heat from burning metal. Metal fires involving magnesium, sodium, potassium and sodium-potassium alloys can be successfully extinguished with this extinguisher. There is data showing that zirconium, uranium, titanium, and powdered aluminum fires can be controlled and extinguished with this unique extinguisher.

Available in 150 lb. Wheeled or Stationary

MODEL B571 contains a copper extinguishing agent specially developed by the U.S. Navy for fighting lithium and lithium alloy fires. The copper compound smothers the fire and provides an excellent heat sink for dissipating heat. Copper powder has been found to be superior to all other known fire extinguishing agents for lithium.

Available in 250 lb. Wheeled

6 YEAR WARRANTY

ABC Dry Chemical

**Manufactured and Tested to
ANSI/UL Standards
ISO-9001:2000 / ISO-14001:2004 Certified
UL LISTED AND USCG APPROVED**

- ★ Dependable Drawn Steel Cylinders
- ★ All Metal Valve Construction
- ★ Easy and more economical to maintain and service
- ★ U/L & U.S. Coast Guard Listed
- ★ Bar Coded and Bi-lingual Labels

(Temperature Range -65°F to 120°F)

Note: All extinguishers are USCG approved with bracket listed on UL label.

Stored Pressure

ABC or Multi-Purpose extinguishers utilize a specially fluidized and siliconized mono ammonium phosphate dry chemical. It chemically insulates Class A fires by melting at approximately 350°F and coats surface to which it is applied. It smothers and breaks the chain reaction of Class B fires and will not conduct electricity back to the operator.

Available in Wheeled and Stationary extinguishers.

6 YEAR WARRANTY

HIGH PERFORMANCE Dry Chemical

**Manufactured and Tested to
ANSI/UL Standards
ISO-9001:2000 / ISO-14001:2004 Certified
UL LISTED AND USCG APPROVED**

EXTRA FEATURES:

- ★ Superior Range (Vertical & Horizontal)
- ★ High (240 PSI) Operating Pressure
- ★ Choice of Chemicals
ABC Multi Purpose, Regular, Purple K
- ★ Select *Fast Flow* for:
High Flow Rate
Fast Discharge
Quicker Knockdown
More Operator Protection
- ★ Select Compliance Flow for:
Long Range
Highest U.L. Ratings
- ★ Painted GALVANIZED DRAWN STEEL Cylinders
(The best corrosion protection available anywhere)
- ★ Protective Rubber Foot Rings
- ★ All Metal Valve Construction
- ★ Gauge Guards
- ★ Bar Coded and Bi-lingual Labels
(Temperature Range -65°F to 120°F)

**Note: All extinguishers are USCG approved with
bracket listed on UL label.**

Stored Pressure

HIGH PERFORMANCE extinguishers are the ultimate choice in fire extinguishers for high hazard, frequent use and extreme environment applications. Economical - less initial cost, lower maintenance costs and greater reliability than cartridge operated extinguishers.

Available in 125 and 250 lb. Wheeled and Stationary extinguishers.

Hot dip galvanized USCG brackets available

All Amerex brackets are quality manufactured of steel with a primed and powder coated paint finish. The paint finish assures many years of use and meets the latest U/L salt spray requirements (240 hrs. @ 20% salt solution - ASTM B117).

Wheeled

The largest variety of QUALITY wheeled fire extinguishers available anywhere. All available in a Stationary configuration (except 50 lb. Carbon Dioxide). See Amerex "Wheeled Fire Extinguishers" brochure for more details.

Halotron I™

Fire Suppression Systems

Vehicle Fire Suppression Systems:

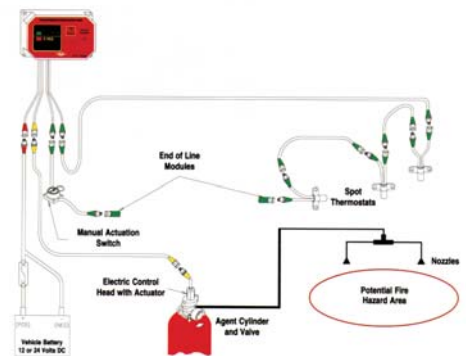

Fire destroys billions of dollars of industrial equipment every year. It causes manpower losses, decreased property value, and, in many cases, human lives. Yet, companies fail to properly protect their workers and industrial equipment from its damaging effects. That's why there is Amerex.

Amerex is one of the nation's leading manufacturers of fire fighting equipment with more engineering, manufacturing and quality control experience than anyone else in the industry. We can protect your equipment from fire with a suppression system designed specifically for you.

Amerex Vehicle Fire Suppression Systems may make it easier to obtain insurance and also help you qualify for lower premiums. As the costs of heavy duty vehicles rise, insurance rates escalate accordingly. Many insurance companies have recognized a reduction in claims paid out due to the presence of a fixed vehicle fire suppression system. The Amerex Fire Suppression System will lower your fire risk, which can lower your insurance premiums. The key phrase is "material change of risk." Ask your insurance agent.

AMGADS III:

(Amerex Mobile Gas Detection System - 3rd Generation) gas monitoring system is a pre-engineered system designed to be utilized on any type of alternately fueled vehicle. The system can be installed by the vehicle OEM or retrofitted. Its advanced technology can detect: Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG), Propane (LPG), Hydrogen and any other hydrocarbon fuel vapors.

SMALL BUS SYSTEM:

Amerex has once again revolutionized the industry with the development of a cost efficient fire suppression system specifically designed for small - front engine transit vehicles. The Amerex Small Vehicle System (SMVS) is designed specifically for use with front engine vehicles such as Para-Transit, Airport Shuttle and other small front engine applications. The SMVS kit includes all hardware components required for a complete turn-key Automatic Fire Suppression System. The electronics portion of the system is made up of a Vehicle Operator Display with Manual Release Push Button, a wiring Interface Module, and two Solid State Heat Detectors. The system is continuously supervised for proper operation. If a trouble condition is present, the Operator Display indicates a diagnostic Service System LED. In the event of a Fire condition, Automatic Fire System actuation occurs, an audible alarm sounds, a Fire LED illuminates and an internal relay is energized. The Control Panel features visual LED system status indicators, a silence-able audible alarm. Backup power is supplied by a standard 9 volt alkaline battery. The Fire Suppression System is FM approved. The electronics also carry CE Type approval.

SYSTEM COMPONENTS:

PLEASE SEE OUR INDIVIDUAL SYSTEMS BROCHURE FOR MORE INFORMATION
AVAILABLE TO AUTHORIZED DISTRIBUTORS ONLY

Fire Suppression Systems

KP RESTAURANT SYSTEM:

The Amerex KP Restaurant System is a pre-engineered, wet chemical, stored-pressure type with a fixed nozzle agent distribution network. The system is listed by Underwriter's Laboratories, Inc., ULC and tested to U.L. Standard 300. The system shall be designed, installed and maintained in accordance with: Amerex Part No. 20150 "Design, Installation and Maintenance Manual", N.F.P.A. 96, N.F.P.A. 17A, local codes and ordinances by an Authorized Amerex KP Systems Distributor using factory trained personnel.

AGENT:

The system agent is Amerex KP liquid fire suppressant, a potassium acetate based solution that suppresses cooking grease fires both through saponification and cooling. The agent has a pH of 9 or less and does not harm stainless steel surfaces.

AGENT CYLINDER :

The agent cylinders are mild steel DOT 4BW 240 specification cylinders, tested to 480 PSI (3309 kPa). The agent cylinder/discharge valve assembly is fully factory charged with Amerex KP liquid agent and pressurized to 240 PSI (1655 kPa).

MRM DETECTION:

The detection network uses a continuous cable run with detectors specifically listed for use with the Amerex KP System.

MECHANICAL RELEASE MODULE (MRM):

The mechanical release module is the spring-loaded type using a mechanical input and electrical, mechanical or pneumatic outputs. It is capable of actuating from one to ten agent cylinder/valve assemblies using one nitrogen cylinder and is operated either automatically by the detection network or manually by a remote manual pull station.

MRM LINEAR FUSIBLE LINK DETECTION:

The link to link system consists of four major components - conduit connector, cable segment beginning and end, conduit box, and link to link cable segment. The link to link cable segment ensures that the links are equally spaced at 24" center to center and yields continuous linear detection from end to end of the hood.

PNEUMATIC RELEASE MODULE (PRM):

The PRM offers superior detection by using a linear pneumatic detection system. The PRM detection system consists of the PRM, tubing and end of line fitting. The tubing is pressurized through a small "accumulator" inside the enclosure, routed throughout the hazard area. When exposed to a fire condition, the tubing ruptures, relieving all of the pressure in the tubing and accumulator thus firing the system using a nitrogen cylinder. The PRM comes complete with enclosure, accumulator, end of line fitting, connector for mechanical manual pull, two SPDT microswitches, and "knock-outs". It is capable of actuating up to 10 cylinders and releasing 2 gas valves. Available in stainless or red enclosure.

ZONE DEFENSE RESTAURANT SYSTEM:

The Zone Defense Restaurant Fire Suppression System is a pre-engineered, wet chemical, stored-pressure type with a fixed nozzle agent distribution network manufactured by Amerex Corporation. The system is listed by Underwriter's Laboratories, Inc., ULC and tested to UL Standard 300. The system shall be designed, installed and maintained in accordance with: Amerex Part No. 20150 "Design, Installation and Maintenance Manual", N.F.P.A. 96, N.F.P.A. 17A, local codes and ordinances by an Authorized Amerex Zone Defense Systems Distributor using factory trained personnel. The Zone Defense system is fully self-contained and does not require electrical power or connection to either domestic water supply or fire sprinkler supply lines.

1. When a fire starts, either detection network will automatically detect the fire or the manual pull station can be used, releasing a low pH agent throughout the hood, duct and onto the appliances.
2. Either method of actuation will interrupt gas or electrical power to the appliances preceding system discharge.
3. The Amerex KP agent quickly extinguishes the fire and cools the fuel while securing the vapors with a smothering foam reaction.

Fire Suppression Systems

AUTOMATIC INDUSTRIAL DRY CHEMICAL SYSTEM:

Our innovative fire extinguisher and automatic system designs have prevented damage and loss that would have been caused by the ravages of fire. Costs associated with lost production time, equipment replacement and "business interruption" are a concern for any industry. In keeping with the Amerex tradition of concern for the customer, the

Amerex "IS" has been designed to offer the best fire protection available and we do it with less. Less equipment means less time to install, less time to service and fewer nozzles to locate (and get in your way). All of this could translate into lower initial cost and lower maintenance cost over the life of the system.

The Amerex "IS" system uses our exclusive ABC (Model 555) dry chemical. ABC dry chemical suppresses more fire, by volume, than any other agent. ABC dry chemical has quick flame "knock-down" and can help to secure Class A fires against re-ignition. Since many hazards involve a variety of fuel sources, our ABC dry chemical, with protection against Class A (wood, paper, pulp), Class B (flammable liquids) and Class C (live electrical equipment) is the agent that is best suited for most industrial hazards.

Vehicle Paint Spray Booth v Total Flood v Open Front Paint Spray Booth v Local Application

DETECTION:

The Amerex "IS" industrial system incorporates an automatic detection system that will operate in case of a fire anytime, 24/7, even if no one is present. As with the rest of the "IS" system design and philosophy, the automatic fire detection system uses fewer components which saves on installation and maintenance costs.

Pneumatic Tubing

Electric Thermal Detectors

Thermal Bulb Detectors

Fusible Link Detectors

PRE-ENGINEERED CLEAN AGENT SYSTEM:

Utilizing an industry recognized fire suppression agent, Amerex has developed an affordable pre-engineered clean agent fire suppression system to protect areas with sensitive electrical equipment and valuable data. As an industry leader in innovative design of products that provide the quality and performance you expect, Amerex has developed the CPS system to be the most cost efficient clean agent system available. The modular design incorporates pre-assembled wiring harnesses and keyed locking connectors on all electrical components to assist you in a simple and confident installation. Agent tanks are available in two sizes having a diameter of ten inches making tank location in confined spaces easier. Tanks are charged with FM-200 in increments of two pounds in a small tank or three pounds in a larger tank for a custom installation without unnecessary expense. Electrical actuators are used for system actuation and can be reset, reducing the number of components to be replaced during service after discharge. The CPS system is designed to use schedule 40 pipe, giving you easy access to the materials you need to complete the installation. Nozzles are available in three designs; corner, side wall, and center room for flexibility in system installation to protect those "challenging" areas. The Amerex CPS is monitored by an electrical control panel that has a battery back-up for 24

hour protection during power failure. Photoelectric smoke detectors are used for detection and are cross zoned to reduce the potential for unwanted system discharge. A bell and horn/strobe device alarm when fire conditions are present. All electrical circuits are supervised and factory terminated.
